SECTION 5: Firefighting measures	
.1. Extinguishing media	
uitable extinguishing media	: Alcohol resistant foam. Carbon dioxide. Dry powder. Use extinguishing media appropriate for surrounding fire.
2. Special hazards arising from the su	Ibstance or mixture
re hazard	: Thermal decomposition generates: Carbon oxides. Hydrogen chloride. Zinc oxide.
xplosion hazard	: Risk of explosion if heated under confinement. Use water spray or fog for cooling exposed containers.
eactivity	: Highly flammable liquid and vapor. Reacts with water, generates gases or heat.
3. Advice for firefighters	
irefighting instructions	: In case of fire: Evacuate area. Fight fire remotely due to the risk of explosion.
rotection during firefighting	: Wear gas tight chemically protective clothing in combination with self contained breathing apparatus. For further information refer to section 8: "Exposure controls/personal protection".
ECTION 6: Accidental release mea	sures
1. Personal precautions, protective ec	quipment and emergency procedures
eneral measures	: Evacuate unnecessary personnel. Ensure adequate air ventilation. Do not breathe gas, fumes, vapor or spray.
.1.1. For non-emergency personnel	
mergency procedures	: Only qualified personnel equipped with suitable protective equipment may intervene.
.1.2. For emergency responders	
rotective equipment	: Do not attempt to take action without suitable protective equipment. For further information refer to section 8: "Exposure controls/personal protection".
mergency procedures	: Gas/vapor heavier than air. May accumulate in confined spaces, particularly at or below ground level. Consider the risk of potentially explosive atmospheres. Eliminate every possible source of ignition.
.2. Environmental precautions	
void release to the environment. Notify authority	ties if product enters sewers or public waters.
.3. Methods and material for containm	ent and cleaning up
